

QUESTIONS THAT A PERSON MUST ANSWER ABOUT THE INFORMATION CODED INTO DNA:

- What is always the cause or producer of coded information?
- What produced or is the cause of the FIRST cells with the FIRST DNA information?
- What produced or is the cause of all the NEW information for all the different creatures on Earth?
- Could mutation errors produce so much new and beneficial genetic information?
- What do mutations actually do to DNA information over time?
- Is there any known NATURAL cause or mechanism to produce the information coded in DNA?
- How is the atheistic belief in an UNKNOWN natural cause of DNA information an illogical, unscientific, BLIND belief in a MAGICAL MYSTERY MECHANISM?
- How is the Christian belief in a living, intelligent God as the Creator of DNA information a more logical, scientific belief?

“The **origin of life** remains one of the great **unsolved mysteries** of modern **science**.” Peltzer PhD,
 * Ocean Chemistry, Scripps Inst, of Oceanography * Quoted from: *Signature of the Cell*, by Meyer PhD
 “... **undirected** chemical **processes cannot** produce the exquisite complexity of the living **cell**. ... there is compelling positive **evidence** for intelligent **design** in the digital **code** stored in the cell’s **DNA**. – Skell PhD, National Academy of Sciences and Prof. **Chemistry** at Penn State Univ. 2009 * Quote from Book Cover: *Signature of the Cell*, by Meyer PhD

DNA Complexity
D.N.A. =
Designed Not Accidental

DNA is a long thin molecule in a human cell with over 3 billion nucleotides (A-T-C-G). If a cell was the size of a basketball, the DNA would be 40 miles long.

D.N.A.: © “Designed Not Accidental”

- Think carefully for a moment:
 - YOU began as 1 cell with *unique* DNA
 - That cell divided into 2, 4, 8, 16, 32, 64, 128, etc
 (for a while all your cells were the same generic cells)
 - Suddenly the coded *information* triggers different, specialized cells to be produced (*bone, nerve, muscle cells*)
 - Plus these cells “had to” form at the “RIGHT” *pre-coded* time, amount, rate, place in **order** to develop YOU.
- Now that’s amazing! But wait ...
 - Some creatures do all of this TWICE!
 - 1st to be an *ugly* caterpillar, then AGAIN to become a *beautiful* butterfly.

Law of Biogenesis vs. Spontaneous Generation

- Natural **Selection** only acts on **living** cells/organisms
- It can NOT select **non-living** chemicals
- Sarfati PhD (*The Greatest Hoax*, p. 234)
 “... the **origin** of the genetic **code** is a **vicious circle**: protein machines are needed to read DNA, but these protein machines are themselves coded on the DNA.”
- See: Myer PhD (*Signature in the Cell*, Oxford Press)
 *All cells have DNA, and NO cell is simple.
 * **Logical Conclusion: A CELL requires INTEL.**
 * Need DNA to make Cell / Need Cell to make DNA

Professor John Walton

- Research Professor of **Chemistry** at St Andrews University
- “The interdependence of DNA and proteins is very remarkable. The coded information in the genomic DNA sequence is useless without the protein-based translation machinery to transform it into cell components. But the instructions for production of this translation machinery are themselves coded on the genomic DNA” p. 191

- SO, IT TAKES DNA TO MAKE A CELL
- YET, IT TAKE A CELL TO MAKE DNA

“Evolution” simply means CHANGE
 The key question is which direction

- **“Micro-evolution”** is a **TRUE** process (just **adaptation**)
 - ONLY **downward** (SELECTION) of existing genes
 - NOT **vertical** change into a NEW “Kind” of life
 - Biblical creationist scientists accept micro-evolution
- **“Macro-evolution”** is a **FALSE** hypothesis
 - Assumes vertical change into new “Kinds” of life
 - **Molecules** to microbes to man by **MUTATIONS**
 - Mutations **DESTROY** DNA over time (Entropy)
 - **CAN’T** create NEW DNA, parts, creatures over time
